WHY REMOUNT?

The primary benefit of purchasing an ambulance remount over new is the financial benefit. We use a customer's existing box or supply a preselected remounted box making it a cost efficient quick replacement. With new ambulance builds approaching 300 days, a new remount will take approximately 90 days. Every FPG ambulance remount is pre-designed and pre-engineered by our experienced staff prior to production.

During the remount process, we can replace worn and outdated parts with new. After completion, FPG ambulance remounts receive a vigorous high-quality review upon delivery.

At the end of the ambulance remount process, our customers have a top of the line, high quality product, just as if you were purchasing a brand-new ambulance. Warranties rival or exceed new ambulance warranties!

FPG is one of only two authorized Braun Ambulance Remounter's in the nation. We can remount any ambulance manufacturer including but not limited to Braun, Demers, AEV, Horton, PL Custom, McCoy Miller and more.

CHASSIS

First Priority Emergency Vehicles works to provide the customer with the best option for the customer. When you decide to purchase an ambulance remount, we can provide a new chassis or have the customer can supply their own.

Chassis options are Type III Gas or Type I with Gas or Diesel motors and 4x4 or 4x2.

FLOORING

New flooring available in every ambulance remount

HVAC

Install new heat and air conditioning units in 12 Volt or combination 12V/110V.

COST

The primary benefit of the ambulance remount route is its financial advantage. We utilize the existing box and end saving time and money. Our customers end up with a top of the line, high quality product, as you would by purchasing a new ambulance while saving money.

ELECTRICAL

High quality electrical systems installed such as PRAN Multiplex systems

GRAPHICS

From concept to completion, we can assist in the design or work with the customer for computer generated emblems, designs and reflective lettering and striping installed on any vehicle.

PAINT & BODYWORK

Custom new paint and body work.

CABINETRY

We offer to install new custom cabinetry to enhance the existing ambulance
